

FALL 2020 UPDATE

Enrollment Data and Student Support

Takeaways

- Though declines in higher education enrollment were anticipated nationwide due to COVID-19, TCC's decrease for fall 2020 was among the lowest of all the Florida colleges.
- Both in-district and full-time populations increased significantly, while the Dual Enrollment program saw a record-breaking 34% growth from last year.
- Approximately 25% of course offerings were face-to-face classes, but the majority were online (asynchronous), Live (synchronous), or a hybrid of the two, to better meet student's needs.
